

## May Newsletter - 2015

Golfing friends,

- The season has started with very warm weather but now it is a bit cool for me. We had our monthly meeting and had the following info given to us.

### The Course

- Fred said he is working to get and keep the greens in the best shape possible.
  - The Board has asked him to have this as a priority as putting is 50% of the round and should have the greens in the best possible condition.
  - Of course this takes time rolling, aerating, sanding, etc., but it is worth it.
- The new tractor with the roller that breaks up grass clumps is working really well.
  - Of course we have to alternate fairways every other day to cover all holes as it is not possible for one tractor to get all of it done in one day.
- Everything else is going according to schedule.
- We are going to put small stone as a bed in ditch on #9 then larger stones scattered to expand the hazard already started.
- The new decks will be stained soon, and the covers put back up.
- We do have a problem with the stream on #15 with the stream really cutting into the bank on our side and will address this with the proper authorities.

### Leagues

- We have started leagues and all is well there.
- Many scores are in the 30's already and we attribute that to good greens.

So all in all, we are off to a good start. Hope you all come out and enjoy the course and camaraderie.

See you soon.
